

3 Pennsylvania Place Ottumwa, Iowa 52501 641-683-3372

October 27, 2020

Vista Woods continues to test residents and staff routinely for COVID-19. One staff member did test positive with a rapid test and has agreed to have a more conclusive test sent to the State Hygienic Lab to confirm that result. Unfortunately, that employee is off work until released by public health.

We continue to have four residents in isolation with one expected to possibly be released this week and another next week. All residents are being assessed daily for any signs or symptoms. Staff are expected to wear the appropriate PPE while in the building and while caring for residents.

We continue to report our COVID-19 status changes to various government agencies and follow their guidance. It appears that cases are rising throughout the State and hospitals are full. The facility expects a vaccine to be delivered and administered to residents and staff in the upcoming 2-3 months. Updates will continue to be available as they occur.

We cannot thank you enough for your patience and prayers through this pandemic. Please be safe.
