

November 26, 2021

Two of our residents have recovered from COVID today however two more were found to be positive during routine testing. All of our residents have been vaccinated and the majority of staff. Our first case this outbreak was traced back to a visitor. We currently have no staff that have tested positive recently. Testing of all residents and staff will continue twice weekly. More open visitation does make more risk of exposures even though everyone is screened in and required to wear masks. Some people have no symptoms but could be unknowingly positive.

As always, thank you for your patience and support throughout this on-going pandemic. It continues to be difficult times for us all. Please stay safe.
