

January 15, 2021

Vista Wood's continues to remain diligent in its efforts to protect resident's and staff from the COVID-19 virus. We continue to test our staff twice weekly and each new resident upon admission. Today we had a questionable COVID-19 positive result on a new resident. That resident was immediately placed in our isolation area and will be treated as being positive until we can verify the status of that case.

Our facility has notified the local and State Department's of Public Health and other State and Federal agencies and follow their recommendations. The staff continues to wear their personal protective equipment with all resident cares. Unfortunately, visitation and many activities continue to be restricted.

The COVID-10 vaccination was given to all consenting residents and staff on January 13. The second dose will be offered in three weeks.

We appreciate all our residents, their families and the community for their continued support during these difficult times. Please continue to check our website for future updates and may God bless you all.
