

July 24, 2020

Vista Woods Care Center has had three employees report respiratory symptoms within the last 72 hours. These employees are being quarantined at home per Iowa Department of Public Health and CDC guidelines.

All employees are screened at the beginning and end of their shifts. Vista Woods Care Center has not allowed any symptomatic employees into the facility. All employees are required to wear Personal Protective Equipment (PPE) while in the facility. We are encouraging all our employees to practice social distancing and precautionary measures while out in the community.

We do not have any confirmed cases of COVID-19. We continue to follow recommendations from Wapello County Public Health, Iowa Department of Public Health, the Department of Inspections and Appeals and the CDC. We also continue to monitor all our residents for any symptoms multiple times each day.

We will continue to update our residents, families, and staff as we get more information. The health and safety of our residents and staff continue to be our top priority.
