

3 Pennsylvania Place Ottumwa, Iowa 52501 641-683-3372

June 12, 2020

Today we had two more resident COVID-19 related deaths making that twelve since on-set. Almost all of those had multiple underlining health conditions. We currently have 12 positive cases in-house with five recoveries.

One employee reported having a positive test result today making a total of 9 cases. Five of those have since recovered and returned to work upon approval from Wapello County Public Health. We have ample supply of Personal Protective Equipment for everyone's protection.

We will continue daily monitoring and weekly surveillance of our residents. Our next facility -wide testing is planned for Sunday. Staff are monitored at the beginning and end of their shifts for symptoms and encouraged to be tested at Test Iowa or their Physician's Office.

We continue to work closely with Wapello County Public Health and Iowa Department of Public Health and follow the recommendations of the CDC. The Iowa State Ombudsman's Office contacted us today and offered their support.

Thank you for your continued support during this time.
